
Secure real-time audio/video communication – H.350, Encryption & Gatekeeper/Proxy – using H.323 (...and a bit SIP)

Tutorial/Workshop Session
- Additional Q&A session -

**19th APAN Meeting
Bangkok, Thailand
January 2005**

Any question?

- Other topics for later workshops?
 - Different configurations of GnuGK, e.g. for NATed networks, etc.?
 - Quality of service?
 - ‘Debugging’ H.323?
 - Network (-structure) analysis?
 - ...

Any questions?

- If you have any questions later, then talk to us (now you know how we look like 😊) or send us an email.
